Premier CIO Forum
BOSTON
March 24-25, 2015
Where Technology and Leadership Meet Face to Face
I find the Premier CIO Forums to be highly valuable opportunities to network and learn. Being held in local market area is an enormous advantage; not only am I able to attend without the huge time burn associated with air travel, but I’m able to form and build relationships with local CIOs. These relationships grow and add increasing value as we see each other at other local events and can even set up opportunities for site visits for our teams to learn from one another! Finally, I find the curated list of technology sponsors to be interesting and relevant."

- Rob Ramrath, CIO, Bose Corporation
Thank you and Welcome to the 4th Annual Premier CIO Forum in Boston.

Attendees across the region have come to expect a dynamic agenda with relevant, up-to-the-minute topics and exciting speakers who will share their wealth of knowledge and experience, helping you gain practical insights into your business challenges. The Premier CIO Forum includes powerful keynotes, informative breakouts, discussions with subject-matter experts, and cutting-edge solution providers.

Our partner, The Society for Information Management (SIM), is an organization intended for Senior IT Executives to discuss and share experiences related to technology and business structure. The group’s mission is to provide an open forum, devoid of sales and marketing solicitations, for area executives with IT decision-making responsibility to network and share their experiences. The Premier CIO Forum adheres to all guidelines which prohibit solicitation by anyone, except for the requested solution providers who have been hand-picked by the Executive Advisory Council of CIOs and Senior IT Executives specific to this region.

We have worked diligently to put together a stimulating and focused agenda, bringing together experts, visionaries and professionals from the IT industry. We look forward to sharing this exciting conference with you.

THE BOSTON SIM CHAPTER IS PROUD TO PARTNER WITH PREMIER EVENT MANAGEMENT IN THIS EXCLUSIVE EXECUTIVE CONFERENCE.

CHECK-IN/REGISTRATION

7:00am-8:15am
PEER-TO-PEER NETWORKING/BUFFET BREAKFAST

8:15am-8:30am
WELCOME & PROGRAM INTRODUCTIONS
Marc DiFrancisco, President & CEO, Premier Event Management
James J. Whalen, Jr., 2015 SIM President, Boston Chapter

8:30am-9:30am
OPENING KEYNOTE: FOLLOW THE LEADER: THE BALANCE OF POWER AND PROGRESS
Presented by: Ann Schatz, Sports Broadcaster & Motivational Speaker
Discussion: At the heart of every great leader is an openness to learn and to be led. At the heart of every success story in team athletics is a dynamic coach who embraces those same vital principals. That coach, that leader asks questions, invites feedback and encourages greatness. Join Ann in this fast paced session that reveals the genius behind inspired action and personal triumphs. Who knew board rooms and locker rooms had so much in common?

9:30am-10:15am
BREAK - Networking Pavilion

10:15am-11:15am
Session 1
SECURITY IN A DEVOPS WORLD
Moderated by: Kevin O’Brien, CEO and Founder, GreatHorn
Panelist: Sam Bisbee, CTO, ThreatStack
Jim O’Neill, CIO, HubSpot
Michael Lester, CSO, Magenic

Discussion: Driving down the time to release and increasing competitive positioning through the adoption of DevOps tools, methodologies, and culture is a growing trend, but one that has had a rocky start. Less than two years ago, DevOps breakout sessions at major security trade shows focused on “the death of security” -- and were met with jeers.
THE SKILLS GAP DEBATE: MYTH OR REALITY?

Presented by: Gary Beach, Publisher Emeritus, CIO Magazine; Author, and Guest Columnist for The Wall Street Journal

Discussion: The numbers are staggering. Six years after The Great Recession ended in 2009, nearly 18 million Americans remain unemployed/underemployed while five million job postings go unfilled. Some blame employers claiming they are too selective in their hiring practices, too stingy with wages and reluctant to offer comprehensive training and development. Employers respond by critiquing public education systems claiming job applicants do not possess the “employability” skills needed in the workplace in the 21st century. Here’s one reason why IT executives must get involved in this debate: your future job depends on it! Gartner recently predicted 30% of “knowledge worker” jobs and 75% of IT infrastructure/legacy application jobs, particularly those with repeatable tasks, could disappear in the next decade replaced by “skills” embedded in software, smart machines and robots. While people can debate about the existence of a skills gap, one issue brings both sides together: the future economic growth, workforce employability and national security of America depends on being a nation committed to a culture of invention and innovation. Gary Beach, publisher emeritus for CIO Magazine, author of the bestselling book “The U.S. Technology Skills Gap” and guest columnist for The Wall Street Journal will thoroughly cover the skills gap topic and share solutions on how IT executives must get involved in this debate.

DELIVERING SOFTWARE IN THE DIGITAL REVOLUTION

Moderated by: John Pearson, General Manager, Magenic Technologies
Panelists: Chris Bowers, Deputy CIO, Boston Consulting Group
Jim Bonasera, CTO & VP of Engineering, Agero
Todd Kokoszka, VP of Engineering, PI Worldwide

Discussion: Our industry continues to go through a “digital revolution”. Software is processing data like never before and pushing that data to our end users across a multitude of interfaces. The demand for high quality software delivered as quickly as possible continues to increase. And, recent studies show that over 40% of all IT Development Projects fail as it relates to missed functionality, cost, and/or timing. Join Magenic General Manager, John Pearson, and a panel of IT leaders to learn what other organizations are doing to return high quality results and accelerate the software development process.
11:30am-12:30pm
Session 2
Eden Vale C

**DRIVING COSTS DOWN & PERFORMANCE UP WITH ADVANCED TECHNOLOGIES**

**Presented by:** Brian Connell, CEO, TFA International

**Discussion:** The opportunities to do “more with less” are better than ever through the use of advanced technologies. The industry sectors of hyper-converged infrastructure, intelligent workload management, as well as the huge shift to enterprise class all-flash storage arrays are the fastest growing areas of technology today.

These innovations have presented us with more cost efficient methods of meeting and exceeding our SLAs around performance, infrastructure management, and disaster recovery. They have also changed many of our processes around IT asset management, technology refresh cycles, and have greatly reduced the reliance on partners for expensive professional services.

Our panel will explore both the operational and business values of these technologies and how they can improve your processes, productivity, and cost model. We will hear perspectives from the practitioner’s process of assessing, selecting, and deploying these technologies, the technology innovators themselves, as well as a partner who is responsible for bringing them together.

12:30pm-2:00pm
LUNCHEON KEYNOTE: THE DATA PROBLEM IN 1960 AND TODAY

**Presented by:** Jon Bachman, VP Product Management, SimpliVity

**Discussion:** 50 years ago, enterprises were facing their first data problems – manufacturing facilities lacked the resources to adjust technology plans in real-time and they needed to become more agile and efficient. This lead to Charles (Charlie) Bachman’s invention of the first direct access database management system, where information and plans were kept in an integrated data store.

Today, the data problem has evolved, data virtualization technology is essential for enterprises to maintain marketshare and keep up with competitors. CIOs need the best of both worlds – x86 cloud economics and enterprise-grade functionalities – to support an agile and face-paced workforce.

Join Jon Bachman, SimpliVity’s VP of Product Management, as he discusses the history of database management, starting with his father’s invention in 1960, and how to evolve your data center to keep up with today’s growing demands.

2:00pm-2:30pm
DESSERT - Networking Pavilion
LEADERSHIP - TRUST IT
Presented by: Tim Hebert, CEO, Atrion
Discussion: In today’s demanding and always-on culture, information technology (IT) must provide certainty to its organization. Whether focusing on people, performance, or productivity, the business is looking – no, trusting – that IT will deliver remarkable business outcomes. However, trust-related problems like instability, delayed and dying projects, weak security, lack of compliance, and misaligned objectives relegate IT into the dungeon of being a cost center. What’s more, the lack of trust erodes IT’s brand and reputation, that once gone, is almost impossible to rebuild!

Hebert leads a conversation on the once-considered “soft issue” of trust, that now has become IT’s most essential hard skill. New research demonstrates that trust has a measurable, observable, and relevant impact on the bottom line. IT can choose to make building trust an explicit goal of their work, and can use the language of trust as an important lever. By creating a culture of trust, IT can and will deliver certainty.

DEVELOPING SERVICE PROVIDER PARTNERSHIPS – SUCCESSES, FAILURES AND LESSONS LEARNED
Presented by: Dave Jackson, Director of IT, CIO, Welch’s
Discussion: In today’s ever increasing complex technical environments, not many companies can find and/or afford to retain all of the talent required. Therefore, partnering with service providers is an increasingly popular and economical way of fulfilling the needs of your business. In this session, Dave Jackson, Director of IT & CIO at Welch’s, will describe the services that Welch’s IT outsources along with elaborating on the significance of partnering with service providers in order to get the most for your dollar. He will discuss what qualities he looks for in a vendor, developing a partnership, and the importance of managing the relationship. He will share successes, failures and lessons learned. Additionally, he will look to the audience for any key insights that participants may be willing to share.

CLOSING KEYNOTE: BOOST YOUR WILLPOWER - SHIFT YOUR LIFE
Presented by: Uri Galimidi, MSc, MBA, Founder and President, The Will to Change
Discussion: Scientists tell us that there are two key virtues that influence our success in life: Intellect and Willpower. Unfortunately, there is little we can do to change the IQ that we are born with. But we can strengthen our willpower.

In this engaging presentation Uri will review the neuroscience of willpower and will share six highly effective neuroscience-based interventions that will help you strengthen your willpower, conquer undesirable habits, adopt new beneficial habits, meet your goals with a higher rate of success, and become the best possible version of yourself.

EXECUTIVE NETWORKING RECEPTION
Admittance by Conference Badge or VIP Pass Only. Complimentary hors d’oeuvres and beverages will be served.

Please give us your feedback on the Boston CIOForum at https://www.surveymonkey.com/r/5P2RDTN
7:30am | CHECK-IN/REGISTRATION

7:30am-9:00am | PEER-TO-PEER NETWORKING/BUFFET BREAKFAST

8:45am-9:00am | WELCOME & PROGRAM INTRODUCTIONS
Eden Vale A & B
Marc DiFrancisco, President & CEO, Premier Event Management

9:00am-10:00am | OPENING KEYNOTE: SOCIAL KNOWLEDGE: ORGANIZATIONAL CURRENCIES IN THE NEW KNOWLEDGE ECONOMY
Eden Vale A & B
Ken Russell, PhD, Executive Director, WSU’s Applied Technology Acceleration Institute | Former Charlotte SIM President
Discussion: Social Knowledge will give you two kinds of insights: knowledge of your community and knowledge about your community. The first is important because it will help you find and develop expertise. The second is important because it will help you wield influence. Effective executives need both and this presentation (and the book) tells the audience how.

10:00am-10:30am | BREAK - Networking Pavilion

10:30am-11:30am | GOVERNMENT AS A DIGITAL BUSINESS
Session 1
Eden Vale A
Bill Oates, CIO, Commonwealth of Massachusetts
Discussion: The Commonwealth aims to meet constituents’ needs wherever they are, in ways that work for them whether that’s via smartphone or in person. When the lines between the technology we use and the people we serve fade away, our state government will be a truly digital business. Across the Commonwealth, we are working hard to reach that goal – and we are eager to engage with you all as we travel this path. A few of our key areas of focus are:

- Accelerating the pace of business change and developing a culture of innovation across state government
- Connecting communities and schools to bridge the digital divide that limits opportunities
- Developing a comprehensive approach for managing reams of government data to enhance both decision-making and constituent services
- Breaking down barriers and building partnerships between state government and the broader IT ecosystem in Massachusetts to leverage the wealth of technical expertise around us
10:30am-11:30am
Session 2
Eden Vale C

ALWAYS-ON: LEVERAGING IT TO ENABLE EMPLOYEES AND THE IMPACT ON WORK/LIFE BALANCE

Moderated by: Mark Staples, CIO, Wentworth Institute of Technology
Panelists: Deborah Scott, CIO, Worcester Polytechnic Institute
Matthew Ferm, Managing Partner, Harvard Partners
Niraj Jetly, SVP-COO/CIO, NutriSavings
Richard Kropp, SVP & CHRO, Blue Cross & Blue Shield

Discussion: Long gone are the days of a traditional 9-5 work day for today’s knowledge workers. Employees today expect remote access to not just check email in the off-hours, but to perform all of their duties. Working remotely from home or the local coffee shop offers both advantages and disadvantages to the employee and employer. How can technology help keep employees connected and able to collaborate, no matter where they are? And how does the notion of being always-on impact one’s personal life? How do CIO’s maintain me-time and not become out of touch?

11:30am - 1:00pm
Eden Vale A & B

LUNCHEON KEYNOTE: CYBER SECURITY ON THREATS & TRENDS
Presented by: Special Agent, Boston FBI
Discussion: A senior member from the CYBER Squad with the Boston FBI will be taking you through an interactive presentation on current Threats & Trends in the world of Cyber Security.

1:00pm - 1:30pm
DESSERT, REFRESHMENTS, AND PRIZE DRAWINGS – Networking Pavilion

SimpliVity, the Data Virtualization Company, was established with the mission of simplifying IT by delivering a new data architecture that powers an assimilated infrastructure platform. SimpliVity’s OmniCube utilizes standard x86 base systems to converge server and storage functionality, along with significant advanced functionality that today is delivered by numerous disparate appliances—all at a fraction of cost and with extreme reduction in complexity.

Information on SimpliVity Corporation is available at www.simplivity.com or by contacting us at +1.508.310.0132 or info@simplivity.com.

Founded in 1995 by the same technical minds that still run the company, Magenic is the leading modern application development firm that can address your organization’s most complex development challenges and deliver software results. As a full-service, professional services partner that has local consultants and a proven process, Magenic will get your projects to market sooner by using premier technical talent in a flexible way that best suits your organization.

For more information, visit www.magenic.com or @magenic

A unique VAR model focused on improving the TCO/ROI of your IT investments in 3 core areas; IT Infrastructure, Virtualization & Cloud Services, Data Protection & BC/DR Strategies. TFA are experts in both traditional & emerging technologies and all projects include a complete TCO analysis for full transparency. For more information, visit www.tfainternational.com

VMTurbo’s Demand-Driven Control platform enables customers to manage cloud and enterprise virtualization environments to assure application performance while maximizing resource utilization.

Pure Storage, the all-flash enterprise storage company, enables the broad deployment of flash in the data center. Pure Storage all-flash enterprise arrays are 10x faster and 10x more space and power efficient at a lower price per GB than spinning disk.

Windstream offers a full suite of advanced network communications and technology solutions, including voice and data services such as VoIP, SIP trunking, MPLS, and dedicated high-speed Internet. Windstream also offers Unified Communications, managed services, cloud computing, disaster recovery, and networking services designed to help businesses increase productivity and improve operational efficiencies. Windstream’s “smart solutions, personalized service” brand promise creates an experience of excellence for small to enterprise customers.

For more information, visit www.windstream.com or @Windstream
The AppDynamics platform gives today’s software-defined businesses the ability to analyze and optimize digital business performance in real time, in production. It’s more than monitoring. It’s true Application Intelligence. 
For more information, visit www.appdynamics.com or @appdynamics

At Automic, we give leaders the freedom to turn ideas into money. We challenge conventional thinking on automation by enabling our customers to be faster, smarter, and in control. By automating the everyday, we enable leaders to lead. 
For more information, visit www.automic.com or @automic

“Aqueduct Technologies, a leading technology solutions provider, advises businesses on their IT strategy. We design, implement, and can manage solutions that achieve your desired business outcomes.”
For more information, visit www.aqueducttech.com or @AqueductTech

Code42 develops intuitive, optimized technology to securely manage and protect the world’s data. Award-winning CrashPlan backup solutions manage exabytes of data across millions of devices in the world. Its SharePlan enterprise-grade file sync/share enables real-time collaboration while enforcing corporate security requirements.
For more information, visit www.code42.com or @code42

Flo-Tech, a 2013 CIO 100 Award Winner, is a national managed print services provider helping organizations achieve efficiencies and performance improvements across their printing and imaging fleets and related business processes.
For more information, visit www.flotech.net or @flotechmps

INetU, the customer-centric cloud company, based combines state of the art managed cloud and hosting solutions with the industry’s premier service and support.
For more information, visit www.inetu.net or @inetu

Information Builders provides solutions for business intelligence, integration, and data integrity that transform data into business value, and customers into market leaders.
For more information, visit www.informationbuilders.com or @infobldrs
iTalent, a leading, global technology consulting services company, provides highly skilled expert resources and managed services that drive innovation and new levels of productivity within the enterprise.

For more information, visit www.italentcorp.com or @italentcorp

MaaS360 by Fiberlink, an IBM company, is the trusted enterprise mobility solution to over 5,000 customers, delivering security and management to applications, documents and devices.

For more information, visit www.maas360.com or @maas360

Plus Consulting develops innovative business-focused solutions that improve an organization’s information, interactions and infrastructure capabilities to lay the groundwork for customer-centric growth and profitability.

For more information, visit www.plusconsulting.com or @PlusConsulting_

WEI is a technology services and solutions provider. We focus on building quality relationship through valued services, collaboration, and education. Our sales and engineers provide cutting edge technology and best practices to optimize our clients compute environment.
