Midwest Technology Leaders are now partnering with Premier Event Management for the MTL 2016 Event!

The Midwest's Premier IT Symposium

Detroit, USA – April 21, 2016 – Midwest Technology Leaders are joining networks with Premier Event Management in producing this year's Midwest's Premier IT Symposium! The Business environment is constantly evolving and needs to be focused toward the future. The Forum's content, developed by regional leaders, is aimed at benefiting regional economies and the corporate, educational, healthcare, government and finance communities of the Midwest region.

This is the only Midwest-based IT executive symposium that combines an influential, exclusive audience and access to distinguished speakers, while supporting the advancement of information technology in the region. The symposium is a nonpolitical, cross-industry, annual event, providing a platform to celebrate the achievements of this strong technology community. Together, this group of thought leaders is finding innovative approaches for IT and business challenges. Internet and local radio shows will be hosting interviews on-site while capturing the captivating information. Anyone who follows the Midwest, technology or the top companies in Michigan should be attending!

Attend MTL to:

- Connect with an influential group of more than 200 leaders in the technology community
- Learn about the emerging trends and new business shifts
- Hear powerful insights from industry leaders
- Learn winning strategies by networking with peers, press, and analysts
- Obtain tactics for exceeding expectations

The Midwest Technology Leaders IT Symposium guarantees a pre-qualified audience of Senior IT Executives. We know the IT trends and challenges these executives face. Our agenda, Executive Faculty and Solution Providers are all focused on providing maximum impact to address these challenges. Midwest Technology Leaders Symposium has grown to include a mentoring program, regional awards, and more IT executive attendees than ever before.
